

# Full PlasmidSeq Limited Offer

**Just till October! Seize the opportunity and get the Full PlasmidSeq for just 15 EUR.**

The Full PlasmidSeq recreates the entire closed-circle plasmid sequence, including annotation, from the raw sequencing reads. The service is **fast, cost-effective, complete, and hypothesis-free**. Unlike Sanger sequencing, neither primers nor prior sequence information is needed. And compared to Illumina sequencing, costs and turnover times are considerably reduced.

**Conditions:**

- Minimal order size:  $\geq 50$  prepaid labels
- Duration: from August 15 until end of October 2023

Would you like to seize the opportunity? Then please contact your sales manager or write an email to [info@microsynth.ch](mailto:info@microsynth.ch) to request your offer.
