

RNA Sequencing at Attractive Prices

With our NovaSeq instrument, we have further improved our RNA sequencing offering. Pricing for RNA sequencing has been significantly reduced and with the new data packages, attractive prices can be achieved for any project.

- **10% discount** on RNA sequencing projects from October to December 2022.*
- For data packages to be applied, the library prep has to be done at Microsynth
- Full workflow from isolation to bioinformatics available
- Test our improved services and prices

** Samples must arrive until 31st of December.*
